

TECHNOLOGY

Governance that keeps pace with how fast you ship

Cyber, AI governance, human risk, and third-party exposure under one practitioner-led lens.

Technology companies scale faster than their governance, until a customer, an acquirer, or a regulator asks a question the current posture cannot answer. Apogee builds the one connected picture that satisfies enterprise buyers, diligence, and AI oversight, led by senior practitioners who have held the decision at Palo Alto Networks and Google Cloud.

WHAT'S DRIVING THE CONVERSATION

- **Enterprise due diligence** · security questionnaires and customer trust
- **SOC 2 / ISO 27001** · attestations buyers now require
- **AI governance** · building or deploying AI under board scrutiny
- **Selling to government** · SBOM, EO 14028, and SSDF expectations
- **Funding or M&A diligence** · substantiating your risk posture, including key-person exposure
- **Rapid scaling** · governance and vetting lagging headcount and product

WHY INTEGRATED MATTERS HERE

For a technology company, risk is customer trust, AI accountability, key-person and insider exposure, and third-party dependency at the same time. Point assessments answer one and miss the rest. Apogee's Nexus of Risk delivers the integrated picture across cyber, physical, and human risk, including an AI Governance framework, grounded in COSO ERM and ISO 31000.

RECOMMENDED ENTRY POINT

Ascend to Meridian. Start with a defensible cyber risk picture (from \$44,500, 6 to 10 weeks) for customer trust or a diligence file. Step up to Meridian for an AI Governance framework and integrated cyber, physical, and human risk reporting.

FRAMEWORKS APPLIED

SOC 2

ISO 27001

NIST CSF 2.0

NIST AI RMF

SSDF

SBOM / EO 14028

CMMC

TPRM

PROOF POINTS

Enterprise Security Buildout

Zero to audit-ready in 90 days; passed first audit.

State Judiciary · 3,000+

NIST CSF 2.0 assessment and remediation at enterprise scale.

M.K. Palmore, Founder and Principal Advisor: retired FBI senior executive, CISSP, Carnegie Mellon CISO; former VP and Field CISO at Palo Alto Networks and cybersecurity executive at Google Cloud. Every engagement is delivered by named senior practitioners. Apogee's AI governance work spans enterprise and public safety contexts.
