APOGEE GLOBAL RMS

TAKING PEOPLE, PROCESS AND TECHNOLOGY TO THE NEXT LEVEL

THE APOGEE VCISO PROGRAM

Executive-grade security leadership, delivered as a team.

The Apogee vCISO Program gives an organization a **named, senior security executive and the full delivery team behind that executive**, for a fixed monthly subscription. Most organizations below the Fortune 1000 cannot justify a full-time CISO, a security engineer, a compliance lead and a program manager. Most fractional offerings solve only the first of those four. Apogee solves all four, without the cost or hiring delay of building an in-house security office.

THE DELIVERY TEAM

A dedicated vCISO from Apogee's Principal Advisor bench, backed by shared specialists who carry pattern knowledge from across the Apogee portfolio.

ROLE	ASSIGNMENT	WHAT THEY OWN
vCISO NAMED	Dedicated, from the Apogee Principal Advisor bench	Security strategy, risk ownership, executive and board reporting, policy authority, incident leadership
Security Engineer	Shared across the portfolio	Architecture review, control validation, vulnerability and configuration oversight, tooling guidance
GRC Consultant	Shared across the portfolio	Framework alignment, policies and standards, risk register, audit and assessment readiness, third-party risk
Program Manager	Shared across the portfolio	Roadmap execution, operating cadence, status reporting, action tracking, stakeholder coordination

WHAT EVERY ENGAGEMENT INCLUDES

- **Security program baseline.** Current-state assessment against NIST CSF 2.0 or the governing framework, with a prioritized 12-month roadmap.
- **Governance and policy.** A complete, approved policy set and a living risk register owned by the vCISO.
- **Executive and board reporting.** Quarterly risk briefings written for decision-makers.
- **Compliance readiness.** Audits, cyber insurance renewals, regulatory and grant requirements.
- **Incident leadership.** Response plan, annual tabletop exercise and a named executive on call.
- **Third-party risk.** Security review of critical suppliers.
- **Program cadence.** Monthly operating reviews, tracked action log, standing steering meeting.

THE FIRST 90 DAYS

DAYS 1–30 Assess — Stakeholder interviews, framework baseline, asset and data inventory review, top-10 risk findings delivered to leadership.

DAYS 31–60 Govern — Risk register established, policy gaps closed, incident response plan drafted, 12-month roadmap approved.

DAYS 61–90 Operate — Steering cadence running, first quarterly leadership briefing delivered, quick-win remediations complete.

From day 91, the program runs on a steady monthly cadence, with the vCISO accountable for roadmap progress and measurable risk reduction each quarter.

> **Through the Nexus of Risk.** Cyber findings are tied to their physical and human consequences, governed as one discipline.

TWO TRACKS, ONE PROGRAM

	PUBLIC SECTOR	ENTERPRISE
BUILT FOR	Cities, counties, special districts, K-12 and higher education, state agencies	Mid-market companies, high-growth firms, PE portfolio companies
REPORTS TO	City or County Manager, IT Director, elected councils and boards	CEO, CFO, CIO and the Board of Directors
FRAMEWORKS	NIST CSF 2.0, CJIS, HIPAA where applicable, state cyber grant requirements, CISA guidance	NIST CSF 2.0, SOC 2, ISO 27001, PCI DSS, SEC cyber disclosure, customer security reviews
OUTCOMES	Grant readiness, continuity of public services, council-ready reporting	Customer and deal trust, insurance readiness, board oversight, sales enablement
CONTRACTING	Multi-year terms aligned to fiscal cycles; SDVOSB, VOSB and California DVBE certified	Annual subscription with defined renewal terms

Practitioner depth

Every vCISO has led security from the inside, under real operational and executive pressure.

A team, not a person

Engineering, GRC and program management are included, not sold as add-ons.

One consequence chain

The Nexus of Risk connects cyber, physical and human risk into one governed discipline.

Proven in the public sector

Apogee delivers vCISO services to municipal government today.

Start with a 30-minute scoping conversation.
